

On July 28, 2020, Axon will release firmware version 1.6.2 for the TASER 7 and TASER 7 CQ conducted energy weapons (CEWs). Promptly installing firmware updates is critical for maintaining the health and serviceability of your agency's CEWs. These releases address a wide range of issues - from simple bugs to enhancements that result in a more reliable weapon to new features that improve your CEWs' performance in the field.

FW Version 1.6.2 fixes minor bugs with agency settings for the TASER 7 CQ.
